Observed <ul style="list-style-type: none">• Player gets Journal Entry STRREF 67302 but does not get Journal Entry STRREF 64443.	
Expected <ul style="list-style-type: none">• As per the MDD, the player should get STRREF 64443 and 67302 when passing through this dialog stream.	
Notes <p>Internal report #21713</p> <ul style="list-style-type: none">• This could EASILY be a WNF and completely my misunderstanding of how the MDD is written. The note on 64443 says "Quest updates when scene ends by any means" which identifies to me that no matter how SDD301b plays out you should get STRREF 64443.• That said, 64443 and 67302 look redundant to me. It's unlikely that players need both STRREF Journal Entries, so if the "Either Or" case is intended it'd be best to update the comment on the MDD to indicate that 64443 is only given under circumstances where 67302 is NOT given.
