Found In Version:	8186		

Description

Copying and pasting placeables isn't properly working for me. Last night, I was able to copy a placeable, but then never could copy another one again - only allowing me to paste that first copied placeable. As of this morning, I can't copy-paste any placeables, simply nothing happens when either keybinds are used.

This has been fixed in the new build: https://forums.beamdog.com/discussion/comment/1076325/#Comment_1076325
Thank you!

- Status changed from New to Needs More Info

Hi, thanks for the report. Can you confirm this has been fixed for you as well?

Unfortunately I'm still having this issue in the new build. I've not been able to pinpoint at an exact time when it happens, but I notice it often enough during my building sessions and have to restart the toolset.
